

Ticket #1594894

Replication of dynamic attributes for created users via Admin UI

Forum

<https://forums.saviynt.com/t5/identity-governance/regex-condition-queries-on-hidden-attributes/m-p/22983/thread-id/11665>

=====

I have reproduced the described case in a smaller user form and used, as recommended, REQ + NREQ in the action string.

Create/Update User

Steuerung

Typ	Vorname interner Mitarbeiter	Vorname externer Mitarbeiter
Select	Middle*pbrtest	Middle*pbrtest

Steuerung

Typ	Vorname externer Mitarbeiter *
EXTERN	Middle*pbrtest

Steuerung

Typ	Vorname interner Mitarbeiter *
INTERN	Middle*pbrtest

The field **Typ** controls the display and hiding of *Vorname interner Mitarbeiter* / *Vorname externer Mitarbeiter*.

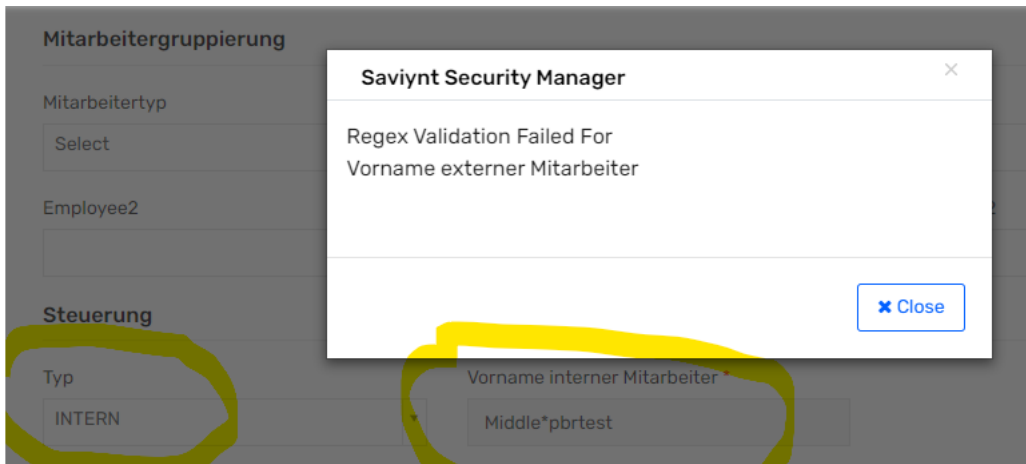

Register User Form Definition

<input type="checkbox"/>	Typ	Typ	ENUM	EXTERN,INTERN	1	Feb 03, 2023	PBR	false	true	false
<input type="checkbox"/>	Vorname_INT	Vorname interner Mitarbeiter	STRING		1	Feb 03, 2023	PBR	middleware	false	false
<input type="checkbox"/>	Vorname_EXT	Vorname externer Mitarbeiter	STRING		2	Feb 03, 2023	PBR	middleware	false	true

Parameter	CONTROLLER	READ ONLY ATTRIBUTE	EDITABLE ATTRIBUTE
Attribute Name*:	Typ	Vorname_INT	Vorname_EXT
Request Type:	User	User	User
Attribute Label:	Typ	Vorname interner Mitarbeiter	Vorname externer Mitarbeiter
Attribute Group: .	Steuerung	Steuerung	Steuerung
Order Index:	0	1	2

Attribute Type:	ENUM	String	String
Values:	EXTERN,INTERN	EMPTY	EMPTY
Default Values:	EMPTY	EMPTY	EMPTY
Regex:	EMPTY	EMPTY	Regex: <code>^[A-Za-z]+((\s)?((\' \\- \\.)?([A-Za-z]))+)*\$</code>
Description:	EMPTY	EMPTY	EMPTY
Action String:	SHOW###Vorname_INT###INTERN__HIDE###Vorname_EXT###INTERN__SHOW###Vorname_EXT###EXTERN__HIDE###Vorname_INT###EXTERN__NREQ###Vorname_INT###EXTERN__NREQ###Vorname_EXT###INTERN__REQ###Vorname_INT###INTERN__REQ###Vorname_EXT###EXTERN	EMPTY	EMPTY
Validation Condition:		EMPTY	EMPTY
Failure Message:		EMPTY	EMPTY
User Column:	EMPTY	middlename	middlename
Required:	FALSE	FALSE	FALSE
Editable On Create:	TRUE	FALSE	TRUE
Editable On Update:	TRUE	FALSE	TRUE
Hide On Create:	FALSE	FALSE	FALSE
Hide On Update:	FALSE	FALSE	FALSE
Duplicate not allowed:	FALSE	FALSE	FALSE
Parent Attribute:	EMPTY	Typ	Typ
What action to perform when Parent attribute changes?:	EMPTY	Mapping	Mapping

If I use this constellation to update a user who already has an irregular character in his **middlename** (possibly created by User Import or Admin Panel), then, when submitting on *Register User Form* - with the **Vorname_EXT** attribute **hidden** - I still receive an error message about the regex validation of the **Vorname_EXT** attribute, although only the **Vorname_INT** attribute- which cannot be edited - is to be displayed during the selection **INTERN** in field **Typ** and therefore **is not to be validated** via REGEX.

What we want is:

a validation of the input for the user attribute **middleware** only when *Typ* **EXTERN** is selected.
